PRANAV VERMA

SOFTWARE ENGINEER • CYBERSECURITY • CLOUD-NATIVE

pranavworksincode@gmail.com | +91 8920039114 | New Delhi, India | LinkedIn | GitHub | Portfolio

Google-certified Cybersecurity Professional and Honours CS graduate specializing in secure automation, cloud-native infrastructure, and full-stack development. Experience spans Go/Kubernetes platform engineering, ML-driven threat defense, and resilient internal architectures. Proficient in Python, Go, full-stack TypeScript, SQL, and modern CI/CD deployment pipelines.

WORK EXPERIENCE

Hoshiarpur Automobiles **04/2026 – Present**

IT Consultant & Developer *Hoshiarpur, PB, India*

- **Internal Workflow Modernization:** Engineered a lightweight service dispatch portal using **Next.js, TypeScript, and PostgreSQL**, standardizing job card issuance and cutting customer vehicle intake time by 35%.
- **Inventory ETL Pipelines:** Built scheduled **Python scripts** to reconcile OEM inventory feeds and daily spare-parts restocks against local store databases, eliminating duplicate manual entries across 15+ supplier categories.
- **Telemetry & Continuity:** Automated scheduled SQL database backups and POS terminal uptime telemetry using Linux cron daemons, minimizing operational checkout friction during peak sales hours.

Energy and Mines | Énergie et des Mines **05/2022 – 08/2023**

Jr. Software Engineer (Professional Experience Program - PEP) *Guelph, ON, Canada*

- **Immersive Web AR Application:** Engineered an interactive Web AR promotional experience for the Foodland Ontario Fair using **8th Wall, JavaScript, CSS, and Java backend hooks**, allowing attendees to launch QR-activated 3D augmented reality assets directly in mobile web browsers.
- **Business Process Automation:** Developed an enterprise business-technology mapping tool using **Power Apps and Dataverse**, winning **1 st prize at the Ontario Public Services Hackathon** for driving cross-ministry operational efficiency.
- **Platform Migration & Reporting:** Spearheaded migration of fiscal platforms to **SharePoint Online**, automating reporting workflows and Power BI dashboards via **Power Automate and Python** to cut manual ledger processing time by 70%.

TECHNICAL PROJECTS

Multi-Tenant Kubernetes Operator **Go, Kubernetes, Kubebuilder, Docker**

- Built a custom Kubernetes Operator automating multi-tenant SaaS lifecycles, CRD reconciliations (`SaaS. infra. io/v1 alpha1`), and namespace provisioning with `LimitRanges` to prevent noisy-neighbor resource contention.
- Implemented an idempotent reconciliation loop with zero-trust `NetworkPolicies` blocking cross-tenant traffic and finalizers for clean tenant teardown.

Binding Knowledge – EdTech Management Platform **Next.js 1 4, React, TypeScript, Supabase, PostgreSQL**

- Engineered a 4-role platform enforcing granular Row-Level Security (RLS) in PostgreSQL, featuring real-time attendance sync, one-click PDF grade exports via `j sPDF` , and automated conflict-free student Roll ID generation.

Email Shield & NetSentinel Security Suite **Python, ML (NLP), WebSockets, Wireshark/tcpdump**

- Created an inbox defense engine utilizing NLP and payload heuristics to intercept phishing and zero-day malicious attachments in real time; built raw-socket network telemetry platform with WebSockets for process-level visualization.

EDUCATION & CERTIFICATION

Wilfrid Laurier University **09/201 9 – 1 0/2024**

Bachelor of Science in Computer Science (Honours) *Waterloo, ON, Canada*

- Distinguished member of university's Professional Experience Program (PEP); Founding President of the Artificial Intelligence Club (2020–2022).

Google Cybersecurity Professional Certificate: 8-course credential spanning network defense, SIEM/IDS tools, Linux/SQL security automation, Python threat scripting, and incident handling protocols.

TECHNICAL SKILLS

Languages: Go, Python, TypeScript/JavaScript, C++, Java, SQL, Prolog, HTML/CSS

Cloud & DevOps: Kubernetes, Kubebuilder, controller-runtime, Docker, CI/CD, Git, Linux, Bash

Frameworks & Web: Next.js 1 4, React, Node.js, WebSockets, REST APIs, Tailwind CSS, 8th Wall

Databases & Tools: Supabase/PostgreSQL, Dataverse, Splunk, Wireshark, tcpdump, Power BI, Power Automate
