

PRANAV VERMA *Software Engineer*

✉ pranavworksincode@gmail.com 📞 +91 8920039114 📍 Flat no. 408, GH 5 & 7, Paschim Vihar, New Delhi, India, 110087

🌐 LinkedIn 🌐 Website

Google-certified Cybersecurity Professional and Honors CS graduate. Expert in Python, full-stack JavaScript, and SQL, specializing in secure automation, ML-driven defense, and robust e-commerce architectures.

🏢 EXPERIENCE

IT Consultant and Developer
Hoshiarpur Automobiles

04/2026 – Present
Hoshiarpur, Punjab, India

- Diagnosed and resolved critical network bottlenecks, ensuring seamless communication between the sales floor and service bays during peak business hours.
- Consulted with management to streamline data compliance and security protocols surrounding sensitive customer and transaction data.

Jr. Software Engineer (PEP)
Ministry of Northern Development & Mines

05/2022 – 08/2023
Guelph, Ontario, Canada

- Migrated fiscal platform to SharePoint Online, automating workflows and Power BI dashboards via Power Automate and Python.
- Built a JavaScript/8th Wall augmented reality web app for free-form 3D object placement which was displayed at Foodland Ontario fair.
- Developed an award-winning business-technology mapping tool using Power Apps and Dataverse, earning 1st prize at the Ontario Public Services Hackathon

🎓 EDUCATION

Wilfrid Laurier University
Bachelor of Science in Computer Science (Hons.)

09/2019 – 10/2024
Waterloo, Ontario, Canada

- Distinguished member of university's Professional Experience Program (PEP), Securing internship at Ministry of Northern Development and Mines.
- Founding President of Artificial Intelligence Club from 2020-2022.

🌟 CERTIFICATES

Google Cybersecurity Professional Certificate — Comprehensive 8-course program covering: | **Security Domains:** Risk Management, Network Security, Assets, Threats, and Vulnerabilities. | **Technical Proficiency:** Linux, SQL, and Cybersecurity automation using Python. | **Incident Response:** Detection and Response protocols (SIEM/IDS tools) and professional job readiness.

📁 RECENT PROJECTS

Email Shield

Built a multi-layered security tool using ML (NLP) and heuristic analysis to intercept phishing and malware. Engineered a real-time adaptive defense system against evolving inbox threats.

NetSentinel

Created a network monitoring tool using Python and React. Implemented raw packet capture and WebSockets to provide real-time, process-level visualization of system network telemetry.

Bloxx Game

Developed a high-performance 3D Tetris-style game in C++, featuring real-time spatial maneuvering, dynamic score tracking, and an escalating difficulty engine optimized for smooth gameplay.

CK Cake Lounge

Engineered a secure full-stack web app featuring automated takeout ordering, payment processing, and real-time tracking. Hardened application security using input sanitization and parameterized queries to eliminate SQL injection and Cross-Site Scripting (XSS) vulnerabilities.

Binding Knowledge

Developed a secure classroom management platform with role-based access control, distinct dashboards, and administrative user provisioning, enabling secure account creation, grading telemetry, and batching features.

💡 SKILLS

Programming Languages: Python, C++, Java, Prolog
Web Development: React, HTML, NodeJS, CSS
Database: SQL, Dataverse, Supabase
Security Tools: Linux, Splunk, Wireshark, tcpdump
Game Development: Unreal Engine, Blender, Unity, 8th Wall

Other Tools: Git, Power BI, Power Automate, Microsoft Suite, Google Suite, ChatGPT, Gemini.
